

# **Sunday 29<sup>th</sup> October**

## **BUILDING AN OTTER HOTEL**

### **10.30 to 12.30**

We'll try again! We couldn't carry out this work in September as the water level was too high. The contractor has been on site and it is ready for us to do our bit to build an OTTER HOLT in the wetland area of the Local Nature Reserve. We shall use wood from the coppicing to build the holts and the pile of chippings will be used to improve the path that leads into the reeds.

If the wet water level rises again we may. Instead, have to clear the encroaching Sea Buckthorn on the main dunes path and the sand ramp from the Main CP.

Tools will not be required for the wetland work, but we shall bring our loppers, secateurs, saws etc for the path clearing.

Meet opposite the hut/barrier 200 metres down the Beach Access Road

Parking may be available in The Ship car park

Wellington Boots and gloves will be essential. We have a good stock of gloves, but you are welcome bring your own.

Under 16s should be accompanied by an adult.
